Highly skilled Mobile Testing Engineer with a decade of experience in the healthcare industry. My career has been dedicated to ensuring that mobile applications used in healthcare meet regulatory standards and provide a seamless user experience. I have a comprehensive understanding of HIPAA compliance and data security protocols. My experience includes testing applications for telemedicine, patient management, and health monitoring.

WORK EXPERIENCE

Senior Mobile Testing Engineer
2020-2023

HealthTech Innovations

- Led mobile application testing for healthcare solutions, ensuring compliance with HIPAA regulations.
- Developed and executed automated testing scripts using Selenium, increasing testing efficiency by 50%.
- Collaborated with healthcare professionals to gather requirements and define testing strategies.
- Conducted usability testing to enhance user satisfaction and application functionality.
- Monitored application performance metrics and suggested enhancements based on data analysis.
- Documented test results and communicated findings to stakeholders, facilitating informed decision-making.

Mobile QA Engineer
2019-2020

MedTech Solutions

- Performed testing on mobile applications focused on patient management and telehealth services.
- Worked closely with cross-functional teams to ensure high-quality deliverables.
- Utilized QTest to manage test cases and track defect resolution.
- Participated in Agile ceremonies and contributed to sprint planning.
- Engaged in regression testing to ensure existing features functioned correctly post-deployment.
- Trained junior testers on testing methodologies and best practices.

ACHIEVEMENTS

- Achieved a 40% reduction in application defects through improved testing processes.
- Recognized for excellence in quality assurance by the healthcare organization.
- Contributed to the successful launch of a telemedicine app that increased patient engagement by 30%.
