- Received 'Excellence in Evaluation' award for outstanding contributions to public health.
- Secured a \$500,000 grant to expand M&E activities across multiple regions.

### PROFILE

Dynamic Monitoring and Evaluation Specialist with a rich background in public health initiatives and extensive experience in data-driven decision-making. Demonstrates a profound ability to design and implement monitoring systems that not only track program performance but also enhance the quality of service delivery. Skilled in collaborating with government agencies and NGOs to align evaluation strategies with national health objectives.

### EXPERIENCE

#### PROGRAM MANAGER, MONITORING AND EVALUATION

##### Health Innovations Group

2016 - Present

- Led the development of a monitoring and evaluation plan for a nationwide health initiative.
- Conducted data analysis to identify program strengths and areas for improvement.
- Managed a team of data collectors and ensured the integrity of data collection processes.
- Coordinated with health departments to align M&E activities with local health priorities.
- Presented evaluation findings to stakeholders, fostering informed decision-making.
- Developed and implemented a training program for local health workers on data management.

#### MONITORING AND EVALUATION ANALYST

##### Global Health Partners

2014 - 2016

- Conducted field assessments to evaluate program effectiveness in maternal health.
- Developed data collection tools and protocols to standardize evaluation processes.
- Analyzed large datasets to inform program adjustments and improve service delivery.
- Collaborated with international teams to share best practices in health program evaluation.
- Facilitated training sessions for local NGOs on monitoring methodologies.
- Authored reports that contributed to strategic planning and funding proposals.
