EXPERTISE SKILLS

- MPLS
- Traffic Engineering
- QoS
- Network Security
- Project Leadership
- Vendor Management

LANGUAGES

- English
- Spanish
- French

CERTIFICATION

- Master of Science in Network Engineering, University of Information Technology

MICHAEL ANDERSON

LEAD MPLS NETWORK ENGINEER

Experienced MPLS Network Engineer with over 10 years in the IT industry, specializing in the integration of MPLS technology into corporate networks. Adept at designing, deploying, and managing robust networking solutions that meet organizational needs. Highly skilled in traffic engineering, quality of service (QoS) implementations, and network optimization. Proven ability to lead large-scale projects and mentor junior staff in best practices.

PROFESSIONAL EXPERIENCE

Innovative Tech Solutions

Mar 2018 - Present

Lead MPLS Network Engineer

- Led the design and implementation of a multi-site MPLS network, improving inter-office communication by 50%.
- Developed QoS policies to prioritize critical business applications, enhancing user experience.
- Coordinated training sessions for junior engineers, fostering a culture of continuous learning.
- Implemented monitoring tools to track network performance and identify issues proactively.
- Worked with stakeholders to align network capabilities with business strategies, ensuring optimal resource allocation.
- Managed vendor relationships for network hardware procurement and support services.

Secure Cloud Networks

Dec 2015 - Jan 2018

MPLS Network Engineer

- Designed and deployed secure MPLS solutions for clients in the finance sector, ensuring compliance with regulatory standards.
- Executed network upgrades that resulted in a 30% improvement in data throughput.
- Conducted risk assessments and mitigated vulnerabilities, enhancing network security posture.
- Prepared detailed documentation for network designs, aiding in future troubleshooting and audits.
- Engaged with cross-functional teams to address complex network challenges and deliver solutions.
- Analyzed network traffic patterns to optimize bandwidth utilization, reducing operational costs.

ACHIEVEMENTS

- Recipient of the 'Excellence in Engineering' award for outstanding contributions to network projects.
- Successfully reduced operational costs by 20% through effective network management strategies.
- Achieved 99.9% network uptime across all services over a 3-year period.
