## 🎓 EDUCATION

**Bachelor of Science in Computer Science**

State University
2016-2020

## ★ SKILLS

- Enterprise Networking
- Infrastructure Management
- Project Management
- Network Monitoring
- Technical Support
- Team Mentorship

## 🗛 LANGUAGES

- English
- Spanish
- French

Experienced Network Architect with a focus on enterprise networking and infrastructure management. Over 11 years of experience in designing, implementing, and maintaining large-scale network solutions for corporate environments. Demonstrated ability to enhance operational efficiency through strategic network upgrades and optimizations. Skilled in project management, ensuring timely delivery of complex network projects while adhering to budget constraints.

## 💼 WORK EXPERIENCE

**Enterprise Network Architect**     2020-2023

Corporate Networks Inc.

- Designed and deployed a scalable network infrastructure that supported growth for over 500 users.
- Led a project to upgrade network hardware, reducing latency by 40% across all departments.
- Implemented network monitoring tools that improved incident response times by 35%.
- Collaborated with IT leadership to align network strategy with business objectives.
- Provided mentorship to junior network engineers, enhancing team capabilities.
- Developed and maintained comprehensive network documentation for compliance audits.

**Network Administrator**     2019-2020

TechCorp Solutions

- Maintained and monitored network systems, ensuring optimal performance and reliability.
- Provided technical support for network-related issues, achieving a resolution rate of 90% on first contact.
- Assisted in the design and implementation of network upgrades.
- Performed regular network assessments to identify potential vulnerabilities.
- Documented network configurations and processes for future reference.
- Trained staff on network policies and procedures to enhance compliance.

## ★ ACHIEVEMENTS

- Successfully completed a network upgrade project that resulted in a 50% increase in overall efficiency.
- Received 'Employee of the Month' award for outstanding contributions to network reliability.
- Implemented a training program that reduced downtime caused by user errors by 30%.
