📍 San Francisco, CA

## SKILLS

- AWS
- Azure
- Terraform
- Python
- Network Security
- DevOps

## LANGUAGES

- English
- Spanish
- French

## EDUCATION

**BACHELOR OF ENGINEERING IN COMPUTER SCIENCE, TECH UNIVERSITY, 2018**

## ACHIEVEMENTS

- Streamlined network provisioning process, reducing deployment time by 30%.
- Recognized for excellence in cloud networking with a 'Rising Star' award.
- Contributed to a project that improved network uptime by 15% through automation.

## PROFILE

Dynamic Network Automation Engineer with a strong foundation in cloud networking and automation technologies. Over 5 years of hands-on experience in deploying and managing automated solutions on AWS and Azure. Expertise in leveraging tools like Terraform, CloudFormation, and Python to enhance the scalability and efficiency of network services. Passionate about utilizing DevOps principles to bridge the gap between development and operations, ensuring seamless application deployment and network performance.

## EXPERIENCE

### NETWORK AUTOMATION ENGINEER

**Cloud Innovations Inc.**

*2016 - Present*

- Designed and implemented automated network provisioning solutions using Terraform.
- Collaborated with the DevOps team to integrate infrastructure as code into the deployment pipeline.
- Developed monitoring scripts to track network performance metrics on AWS.
- Optimized cloud resource usage, achieving cost savings of 20% in network operations.
- Conducted security assessments of network configurations and automated remediation processes.
- Participated in cross-functional Agile teams to enhance network service delivery.

### JUNIOR NETWORK ENGINEER

**Digital Solutions Co.**

*2014 - 2016*

- Assisted in the deployment of automated network configurations for client projects.
- Supported troubleshooting efforts by developing diagnostic scripts.
- Documented network automation processes and best practices for team reference.
- Engaged in regular training workshops to enhance network automation skills.
- Helped maintain network documentation and device inventories.
- Monitored network performance and reported on key metrics to management.
