# MICHAEL ANDERSON

## WIRELESS NETWORK ENGINEER

Innovative Network Planning Engineer with a strong background in designing and optimizing wireless networks. Over 6 years of experience in the telecommunications industry, focused on enhancing user connectivity and satisfaction. Proficient in the latest wireless technologies and standards, with a track record of implementing solutions that improve coverage and performance. Skilled in conducting field tests and analyzing data to inform network design decisions.

## **PROFESSIONAL EXPERIENCE**

### **Innovative Telecom**

*Mar 2018 - Present*

#### Wireless Network Engineer

- Designed and implemented a city-wide wireless network, increasing coverage by 40%.
- Conducted site surveys to identify optimal locations for new access points.
- Analyzed network performance data to identify and rectify issues affecting user experience.
- Collaborated with IT teams to integrate new wireless technologies into existing infrastructure.
- Managed vendor relationships to ensure timely delivery of network equipment.
- Prepared detailed project documentation and user guides for network installations.

### **ConnectPlus**

*Dec 2015 - Jan 2018*

#### Network Technician

- Assisted in the deployment of wireless networks for commercial clients, ensuring optimal configuration.
- Performed troubleshooting on network devices, significantly reducing resolution times.
- Maintained accurate records of network configurations and changes.
- Provided technical support to clients regarding wireless connectivity issues.
- Conducted training sessions for staff on wireless network management.
- Participated in team meetings to discuss network performance improvements and client feedback.

## **ACHIEVEMENTS**

- Recognized for outstanding performance in the implementation of a new wireless service, leading to a 50% increase in customer satisfaction.
- Achieved a 30% improvement in service reliability through proactive network management.
- Contributed to a team project that reduced installation times by 25% through process optimization.
