EXPERTISE SKILLS

- Manufacturing Networks
- Performance Optimization
- Security Protocols
- Team Management
- Technical Support
- Documentation

LANGUAGES

- English
- Spanish
- French

CERTIFICATION

- Bachelor of Engineering in Computer Science, Institute of Technology

MICHAEL ANDERSON

NETWORK INFRASTRUCTURE MANAGER

Versatile Network Systems Engineer with a rich background in the manufacturing sector, bringing over 12 years of experience in optimizing network systems for operational excellence. My career has been focused on integrating network technologies that enhance production efficiency and minimize downtime. Skilled in managing multi-site networks, I have a proven ability to design solutions that align with business goals and support scalability.

PROFESSIONAL EXPERIENCE

Advanced Manufacturing Solutions

Mar 2018 - Present

Network Infrastructure Manager

- Oversaw the design and implementation of a multi-site network that improved data transfer speeds by 50%.
- Managed a team of engineers to optimize network performance, resulting in a 40% reduction in outages.
- Implemented network monitoring solutions that provided real-time performance analytics.
- Collaborated with production teams to align network capabilities with operational needs.
- Developed and enforced security protocols that protected critical manufacturing data.
- Conducted regular training sessions for staff on network best practices.

Industrial Networks Inc.

Dec 2015 - Jan 2018

Network Engineer

- Designed network layouts for new manufacturing facilities, optimizing resource allocation.
- Configured and maintained routers and switches, ensuring minimal downtime.
- Assisted in the migration of legacy systems to cloud-based solutions.
- Performed regular network assessments to identify and mitigate vulnerabilities.
- Documented all network configurations and changes for compliance purposes.
- Provided technical support and training to manufacturing staff, enhancing productivity.

ACHIEVEMENTS

- Achieved a 25% reduction in operational costs through strategic network upgrades.
- Received the 'Excellence in Engineering Award' for outstanding contributions to network design.
- Successfully led a project that improved system uptime to 99.99%.
