Highly motivated Network Virtualization Engineer with 3 years of experience in educational technology. I have a passion for leveraging virtualization to create robust and secure network environments that support modern learning systems. My expertise includes implementing network solutions that facilitate online learning and data management for educational institutions. I am skilled in utilizing tools such as VMware and Cisco to build efficient networks that enhance both teaching and learning experiences.

💼 WORK EXPERIENCE

Network Virtualization Engineer   2020-2023
EduTech Solutions

- Developed and managed a virtualized network that supports online learning platforms, improving accessibility for students.
- Implemented security measures to protect sensitive student data and ensure compliance with education regulations.
- Collaborated with educators to assess network needs and optimize system performance.
- Provided training for staff on managing virtualized environments and best practices.
- Assisted in troubleshooting network issues to minimize disruptions to online learning.
- Documented network configurations and procedural guidelines for future reference.

IT Support Specialist   2019-2020
Learning Innovations

- Provided technical support for educational software and network systems.
- Assisted in the setup of virtual classrooms and online learning environments.
- Monitored system performance and reported issues to senior IT staff.
- Engaged in training sessions to enhance staff understanding of technology tools.
- Supported the integration of new educational technologies into existing systems.
- Documented common issues and solutions for future reference.

★ ACHIEVEMENTS

- Improved online learning accessibility by 50% through effective network management.
- Acknowledged for outstanding contributions to the integration of technology in education.
- Contributed to a project that won the 'Best Educational Innovation' award in 2021.
