Dynamic Networking Analyst with over 4 years of experience in the financial services industry, focusing on enhancing network performance and security. I possess a unique blend of technical expertise and business acumen, which enables me to align network solutions with organizational objectives. My experience includes managing network projects that support financial transactions while maintaining compliance with industry regulations.

## WORK EXPERIENCE

### Networking Analyst | FinanceCorp

Jan 2022 – Present

- Monitored network performance to ensure the reliability of financial transaction systems.
- Collaborated with stakeholders to implement network solutions that support business goals.
- Conducted risk assessments to identify and mitigate vulnerabilities in the network.
- Provided technical support for network-related issues impacting financial operations.
- Developed documentation for network processes to ensure compliance with regulations.
- Participated in the planning and execution of network upgrades to enhance performance.

### Junior Networking Support Specialist | Banking Solutions Group

Jul 2019 – Dec 2021

- Assisted in the maintenance of network infrastructure for banking operations.
- Provided first-level support for network connectivity issues, ensuring quick resolution.
- Documented network changes and updates to support compliance efforts.
- Conducted training sessions for staff on network security best practices.
- Monitored network performance metrics and reported findings to senior analysts.
- Supported the implementation of security measures to protect sensitive financial data.
