EDUCATION

BACHELOR OF SCIENCE IN ENVIRONMENTAL SCIENCE, GREEN VALLEY UNIVERSITY, 2008

ACHIEVEMENTS

- Achieved a 40% increase in farmer participation in organic programs over two years.
- Received the 'Innovative Educator' award from the National Agroecology Association in 2019.
- Published findings in the Journal of Organic Agriculture, contributing to the field's body of knowledge.

PROFILE

Innovative Organic Farming Extension Specialist with extensive experience in regenerative agriculture and agroecology. Expertise in integrating scientific research with practical farming solutions to enhance productivity and sustainability within organic systems. Demonstrated proficiency in designing and implementing outreach programs that educate farmers on the benefits of organic practices and environmental stewardship. Proven track record of increasing farmer adoption rates of sustainable practices through hands-on training and support.

EXPERIENCE

AGROECOLOGY PROGRAM MANAGER

EcoAgri Development Group

2016 - Present

- Led the development of an agroecology curriculum that reached over 200 farmers.
- Implemented soil health improvement programs that increased organic matter by 25%.
- Created partnerships with local NGOs to enhance outreach efforts.
- Conducted workshops on water conservation techniques in organic farming.
- Utilized GIS technology to map local agricultural resources.
- Facilitated peer-to-peer learning sessions to share best practices among farmers.

ORGANIC FARMING TRAINER

Nature's Way Cooperative

2014 - 2016

- Developed and executed training programs that improved organic certification rates by 35%.
- Conducted on-site consultations to assess and improve farming practices.
- Collaborated with agricultural extension offices to disseminate research findings.
- Organized local farmer markets to promote organic produce.
- Engaged in community outreach to raise awareness of organic farming benefits.
- Published articles in local agricultural magazines to promote sustainable practices.
