WORK EXPERIENCE

Pain Management Nurse

2020-2023

Comprehensive Pain Center

- Managed a diverse caseload of patients with chronic pain conditions, developing individualized treatment plans.
- Utilized both pharmacological and non-pharmacological methods to address patient pain.
- Conducted patient and family education sessions on pain management techniques.
- Collaborated with a team of healthcare providers to enhance patient care and outcomes.
- Maintained accurate records of patient assessments, treatments, and progress.
- Participated in research initiatives aimed at improving pain management practices.

Nurse Supervisor

2019-2020

Acute Care Hospital

- Oversaw nursing staff and ensured compliance with pain management protocols.
- Developed training programs for nursing staff on best pain management practices.
- Conducted performance evaluations and implemented quality improvement initiatives.
- Collaborated with administration to enhance patient care standards across departments.
- Facilitated interdisciplinary meetings to discuss patient care strategies.
- Actively engaged in community outreach to promote awareness of pain management issues.

ACHIEVEMENTS

- Improved patient outcomes by implementing a new pain management protocol that reduced hospital stays by 20%.
- Recognized with the 'Nursing Excellence Award' for leadership in pain management.
- Published an article on innovative pain management strategies in a nursing journal.
