

# MICHAEL ANDERSON

Network Security Penetration Tester

- San Francisco, CA
- (555) 234-5678
- michael.anderson@email.com

Detail-oriented Penetration Tester with over 2 years of experience focusing on network security assessments. My expertise includes identifying vulnerabilities in network infrastructures and providing actionable remediation strategies. I am proficient in using various security tools and methodologies to assess network security, including firewall configurations and intrusion detection systems. My technical background, combined with a passion for cybersecurity, drives my commitment to helping organizations protect their networks against evolving threats.

## WORK EXPERIENCE

### Network Security Penetration Tester | NetSecure Solutions

Jan 2022 – Present

- Conducted penetration tests on client networks, identifying vulnerabilities in firewall configurations.
- Utilized tools such as Nessus and Wireshark to analyze network security.
- Provided detailed reports with recommendations for network security improvements.
- Collaborated with IT teams to implement security best practices.
- Participated in security awareness training sessions for employees.
- Monitored network traffic for potential security breaches.

### Security Analyst Intern | CyberDefense Corp.

Jul 2019 – Dec 2021

- Assisted in security assessments on network infrastructures.
- Learned about network security tools and methodologies.
- Documented findings and assisted in preparing security reports.
- Participated in team discussions on improving network security practices.
- Gained practical experience in analyzing network traffic.
- Supported the development of network security policies.

## SKILLS

Network Security

Penetration Testing

Vulnerability Assessment

Nessus

Wireshark

Firewall Configuration

Security Auditing

Risk Management

## EDUCATION

### Bachelor of Science in Cybersecurity

2015 – 2019

National University

## ACHIEVEMENTS

- Contributed to a significant reduction in network vulnerabilities for clients.
- Recognized for excellence during the internship program.
- Developed a network security awareness program for employees.
