

# MICHAEL ANDERSON

## GREENHOUSE OPERATIONS MANAGER

### PROFILE

A detail-oriented Plant Production Specialist with over 7 years of experience in the horticultural industry. Expertise in greenhouse management, focusing on plant health, pest management, and efficient production techniques. Demonstrated ability to implement sustainable practices that enhance plant growth while reducing environmental impact. Proficient in the use of advanced software for monitoring and managing plant production systems.

### EXPERIENCE

#### GREENHOUSE OPERATIONS MANAGER

##### EcoGrow Greenhouses

2016 - Present

- Managed operations of a 200,000 sq. ft. greenhouse facility, focusing on plant health and productivity.
- Implemented integrated pest management strategies, reducing pesticide usage by 40%.
- Utilized climate control systems to optimize growth conditions, enhancing plant quality.
- Coordinated with the sales team to align production schedules with market demand.
- Developed training programs for staff on best practices in greenhouse management.
- Initiated a recycling program for plant materials, improving sustainability efforts.

#### ASSISTANT PLANT PRODUCTION MANAGER

##### FloraTech Nursery

2014 - 2016

- Assisted in managing day-to-day nursery operations, focusing on plant propagation and care.
- Conducted soil tests and adjusted nutrient mixtures for optimal plant growth.
- Monitored and recorded plant health data, providing insights for production improvements.
- Collaborated with marketing to develop promotional materials showcasing plant varieties.
- Maintained inventory of plant stock and supplies, ensuring timely availability.
- Participated in community outreach programs to promote sustainable gardening practices.
