- French

## EDUCATION

**MASTER'S IN PLANT PATHOLOGY, UNIVERSITY OF FLORIDA**

## ACHIEVEMENTS

- Reduced pesticide use by 40% through the implementation of integrated pest management.
- Developed a community program that educated over 500 farmers on sustainable practices.
- Recognized with the Eco-Farming Award for contributions to sustainable agriculture.

## PROFILE

An innovative Plant Science Specialist with a focus on sustainable agriculture and environmental stewardship. Over 8 years of experience in plant pathology, pest management, and crop production techniques. Expertise in developing integrated pest management strategies that reduce chemical use while maximizing crop health. Strong communicator with a proven ability to educate farmers and agribusiness stakeholders on best practices for sustainable farming.

## EXPERIENCE

### PLANT PATHOLOGIST

**EcoAgri Research Institute**

*2016 - Present*

- Conducted extensive research on plant disease management strategies.
- Developed educational materials for growers on pest identification and control.
- Collaborated with agricultural extension services to disseminate findings.
- Utilized laboratory techniques to diagnose plant diseases.
- Managed field trials to assess disease resistance in various crops.
- Participated in community workshops to promote sustainable practices.

### AGRICULTURAL TECHNICIAN

**Harvest Innovations**

*2014 - 2016*

- Assisted in the development of pest management programs.
- Collected and analyzed plant samples for research purposes.
- Maintained laboratory equipment and conducted experiments.
- Supported senior researchers in field studies and data collection.
- Documented findings and contributed to project reports.
- Engaged with local farmers to understand their pest management needs.
