SKILLS

- Ecology
- Environmental Science
- Restoration
- Community Engagement
- Data Collection
- Report Writing

LANGUAGES

- English
- Spanish
- French

EDUCATION

MASTER'S IN ENVIRONMENTAL SCIENCE, UNIVERSITY OF WASHINGTON

ACHIEVEMENTS

- Successfully restored 10 acres of native habitat in collaboration with local groups.
- Increased community participation in restoration events by 50%.
- Published findings on invasive species impacts in regional journals.

WORK EXPERIENCE

ECOLOGIST

EcoRestoration Group

2020 - 2025

- Conducted ecological assessments to evaluate plant community health.
- Developed restoration plans for degraded ecosystems.
- Collaborated with community groups on native plant initiatives.
- Led field surveys to monitor plant species diversity.
- Educated the public on the benefits of native plant landscaping.
- Prepared reports on restoration project outcomes for stakeholders.

RESEARCH ASSISTANT

Native Plant Society

2015 - 2020

- Assisted in research on the effects of invasive species on native flora.
- Conducted fieldwork to collect data on plant populations.
- Supported educational outreach programs in schools.
- Developed informational materials on native plants.
- Participated in restoration volunteer days with community members.
- Documented findings and contributed to research publications.
