### WORK EXPERIENCE

#### Public Health Policy Analyst

2020-2023

National Institute of Health Policy

- Led research initiatives evaluating the effectiveness of public health interventions, resulting in significant policy improvements.
- Collaborated with healthcare professionals to assess the impact of proposed health policies on community health outcomes.
- Presented research findings to policymakers, advocating for data-driven decision-making in health policy.
- Authored comprehensive reports that synthesized health data into accessible formats for stakeholders.
- Managed a team of research associates, providing training and oversight in public health research methodologies.
- Engaged in community outreach efforts to gather qualitative insights from affected populations.

#### Research Associate

2019-2020

Center for Health Policy Research

- Conducted epidemiological studies to assess health trends and outcomes in various populations.
- Utilized statistical software for data analysis, enhancing the accuracy of health policy recommendations.
- Collaborated with interdisciplinary teams to develop comprehensive public health strategies.
- Presented findings at health conferences, contributing to the broader discourse on public health policy.
- Participated in grant writing efforts to secure funding for public health research projects.
- Engaged with community stakeholders to ensure research relevance and applicability.

### ACHIEVEMENTS

- Instrumental in developing a state-wide health initiative that improved access to mental health services.
- Received the Public Health Excellence Award for outstanding contributions to health
