

MICHAEL ANDERSON

POWER OPERATIONS MANAGER

PROFILE

Accomplished Power Generation Manager with a robust background in large-scale renewable energy projects and a commitment to sustainability. Over 12 years of experience managing teams and projects in both traditional and alternative energy sectors. Expertise in project lifecycle management from conception through execution, ensuring alignment with strategic objectives and industry standards.

EXPERIENCE

POWER OPERATIONS MANAGER

Renewable Energy Solutions

2016 - Present

- Managed operations for a portfolio of solar and wind power plants generating over 300 MW.
- Implemented energy storage solutions that increased grid reliability and reduced peak demand.
- Led a team of engineers in optimizing plant performance, achieving a 15% increase in output.
- Negotiated power purchase agreements that secured favorable pricing for long-term contracts.
- Conducted feasibility assessments for new renewable energy projects.
- Developed operational protocols that enhanced safety and compliance measures.

PROJECT MANAGER

Green Power Solutions

2014 - 2016

- Oversaw the development of wind energy projects from initial site assessment through commissioning.
- Coordinated cross-functional teams to ensure project milestones were achieved on schedule.
- Developed detailed project plans, budgets, and timelines, maintaining strict adherence to deadlines.
- Engaged with local communities to address concerns and promote project benefits.
- Monitored project performance and implemented corrective actions as necessary.
- Facilitated training workshops for stakeholders on renewable energy technologies.
