- French

EDUCATION

BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING, UNIVERSITY OF TEXAS, 2015

ACHIEVEMENTS

- Achieved a 25% improvement in safety compliance scores post-training.
- Recognized for excellence in training innovation by industry peers.
- Successfully reduced training duration by 15% while maintaining content quality.

PROFILE

Dynamic and results-oriented Power Generation Trainer with a robust history in operational excellence and adult education. Expertise in designing and executing training programs tailored to the unique needs of power generation facilities. Adept at utilizing innovative instructional techniques to enhance learner engagement and retention. Extensive experience in conducting on-site training assessments to ensure compliance with industry regulations.

EXPERIENCE

LEAD POWER GENERATION TRAINER

Renewable Energy Corp

2016 - Present

- Developed and implemented training programs for renewable energy technologies.
- Conducted workshops on operational safety and environmental compliance.
- Utilized performance metrics to tailor training initiatives to employee needs.
- Created assessment tools to measure training outcomes and effectiveness.
- Facilitated cross-functional training sessions to enhance team collaboration.
- Provided mentorship to junior trainers to improve instructional delivery.

POWER SYSTEMS TRAINER

Electric Utility Services

2014 - 2016

- Designed training modules focused on power system operations and maintenance.
- Delivered training on regulatory compliance and safety standards.
- Implemented interactive training sessions using simulation software.
- Evaluated training effectiveness through participant assessments and feedback.
- Collaborated with engineering teams to integrate technical knowledge into training.
- Organized training events to promote safety awareness among employees.
