Accomplished Production Systems Engineer with over 9 years of experience in the pharmaceutical industry, specializing in the implementation of production systems that ensure regulatory compliance and product quality. My career is marked by a commitment to continuous improvement and operational excellence. At PharmaTech, I led a project that automated batch processing, resulting in a 35% increase in production efficiency while maintaining compliance with FDA regulations.

WORK EXPERIENCE

Senior Production Systems Engineer | PharmaTech

Jan 2022 – Present

- Automated batch processing systems, achieving a 35% increase in production efficiency.
- Ensured compliance with FDA regulations through rigorous process validation.
- Developed and implemented quality control measures to enhance product safety.
- Collaborated with cross-functional teams to drive continuous improvement initiatives.
- Conducted risk assessments to identify and mitigate potential production issues.
- Trained staff on compliance standards and best practices in production.

Production Engineer | MediCorp

Jul 2019 – Dec 2021

- Supported the implementation of quality assurance processes in production.
- Monitored production metrics, achieving a 20% reduction in cycle times.
- Assisted in the development of new product lines through process innovation.
- Participated in safety audits and compliance inspections.
- Provided training for new equipment and best practices to production staff.
- Collaborated with R&D to streamline product development processes.
