- Research Methodology
- Quality Assurance
- Patient Care

LANGUAGES

- English
- Spanish
- French

EDUCATION

MASTER OF SCIENCE IN CLINICAL PSYCHOLOGY, UNIVERSITY OF HEALTH SCIENCES, 2017

ACHIEVEMENTS

- Improved patient assessment tools, leading to a 20% increase in treatment satisfaction.
- Co-authored a publication that advanced the field of psychometrics in healthcare.
- Received recognition for outstanding contributions to mental health research.

With over 5 years of experience in the healthcare sector, I am a Psychometrics Researcher dedicated to improving patient assessment tools and psychological measures. My background in clinical psychology has equipped me with unique insights into the psychological constructs relevant to health outcomes. I have worked on developing assessments that help healthcare providers better understand patient needs and treatment efficacy.

WORK EXPERIENCE

PSYCHOMETRICS RESEARCHER
Healthcare Assessment Solutions
2020 - 2025

- Developed psychometric tests for assessing mental health conditions.
- Collaborated with clinicians to validate assessments for patient use.
- Conducted statistical analyses to evaluate test reliability and validity.
- Presented research findings to healthcare professionals at conferences.
- Created user-friendly manuals for administering assessments.
- Participated in quality assurance processes to maintain test standards.

RESEARCH ASSISTANT
Mental Health Institute
2015 - 2020

- Assisted in research projects focused on psychological assessment.
- Conducted literature reviews related to psychometric measures.
- Helped design surveys to assess patient-reported outcomes.
- Analyzed data using statistical software to inform research conclusions.
- Contributed to grant proposals for funding new research initiatives.
- Supported the development of training materials for clinicians.
