EDUCATION

**MASTER OF ENVIRONMENTAL HEALTH,
UNIVERSITY OF ECO-SCIENCE, 2013**

ACHIEVEMENTS

- Secured \$75,000 in funding for community environmental health programs.
- Increased community participation in clean-up events by 60% through targeted outreach.
- Published research on air quality in a leading environmental health journal.

Innovative Public Health Outreach Specialist with a focus on environmental health issues, bringing 7 years of experience in promoting sustainable health practices. Proven ability to design and implement community programs that address the health impacts of environmental hazards. Experienced in conducting workshops, developing educational materials, and collaborating with environmental agencies to promote awareness and action.

WORK EXPERIENCE

ENVIRONMENTAL HEALTH OUTREACH COORDINATOR

Clean Air Initiative

2020 - 2025

- Developed and executed community education programs on air quality and respiratory health.
- Collaborated with government agencies to promote policy changes that reduce air pollution.
- Conducted assessments of community exposure to environmental hazards and reported findings.
- Organized public forums to discuss environmental health concerns with residents.
- Created educational materials that simplified complex environmental health topics for public understanding.
- Engaged with youth groups to foster environmental stewardship and awareness.

PUBLIC HEALTH RESEARCH ASSOCIATE

Environmental Health Research Institute

2015 - 2020

- Conducted research on the health impacts of lead exposure in urban communities.
- Analyzed data trends to inform public health policies and intervention strategies.
- Collaborated with cross-disciplinary teams to develop comprehensive health reports.
- Presented research findings at national public health conferences to raise awareness.
- Contributed to grant proposals aimed at funding environmental health initiatives.
- Developed partnerships with local schools to educate students on environmental health issues.
