EDUCATION

**BACHELOR'S IN PUBLIC HEALTH,
COLLEGE OF HEALTH STUDIES**

ACHIEVEMENTS

- Successfully managed an outbreak response that reduced infection rates by 30%.
- Published research findings in a peer-reviewed journal on chronic disease trends.
- Received 'Outstanding Research Assistant' recognition for contributions to public health studies.

PROFILE

Results-oriented public health practitioner with over 5 years of experience in epidemiology and disease prevention. Strong background in conducting field investigations and outbreak response. Adept at collaborating with healthcare providers and community agencies to enhance disease surveillance systems. Possesses a robust analytical skill set to interpret complex health data. Committed to improving public health outcomes through research and evidence-based interventions.

EXPERIENCE

EPIDEMIOLOGIST

County Health Office

2016 - Present

- Monitored infectious disease trends and conducted investigations of outbreaks.
- Collaborated with local hospitals to improve reporting systems for communicable diseases.
- Utilized GIS mapping to identify high-risk areas and inform public health responses.
- Developed educational materials for community outreach related to disease prevention.
- Trained health department staff on best practices for data collection and analysis.
- Presented epidemiological findings at state health conferences to share insights and strategies.

PUBLIC HEALTH RESEARCH ASSISTANT

University Research Center

2014 - 2016

- Assisted in research projects focused on chronic disease epidemiology.
- Conducted literature reviews and prepared reports on health disparities.
- Supported data collection efforts through surveys and interviews with participants.
- Analyzed quantitative data to identify trends and inform research outcomes.
- Collaborated with a multidisciplinary team to design public health interventions.
- Contributed to grant writing efforts, resulting in \$50,000 funding for research initiatives.
