WORK EXPERIENCE

Behavioral Health Research Specialist

2020-2023

Substance Abuse and Mental Health Services Administration (SAMHSA)

- Conducted research on the effects of socioeconomic factors on substance use among youth.
- Developed and implemented community interventions to address identified issues.
- Analyzed qualitative data from focus groups to inform program development.
- Collaborated with local agencies to provide resources for at-risk populations.
- Presented research findings to stakeholders, advocating for policy changes.
- Designed educational materials to reduce stigma and promote mental health awareness.

Research Associate

2019-2020

Community Mental Health Center

- Assisted in the analysis of data related to substance use trends in the community.
- Conducted surveys to assess the impact of intervention programs on participants.
- Collaborated with healthcare providers to improve access to mental health services.
- Maintained project databases and ensured data integrity.
- Participated in community outreach efforts to raise awareness of available resources.
- Supported grant writing initiatives for funding of mental health projects.

ACHIEVEMENTS

- Published findings on socioeconomic impacts on substance use in a major public health journal.
- Secured over \$250,000 in funding for community-based substance abuse programs.
- Recognized for excellence in community engagement by local health organizations.
