

MICHAEL ANDERSON

LEAD RADIOGRAPHIC TESTING TECHNICIAN

PROFILE

Highly skilled Radiographic Testing Technician with a strong background in the aerospace industry, specializing in non-destructive testing methodologies to ensure the structural integrity of critical components. Demonstrated expertise in utilizing radiographic imaging technologies to perform quality inspections that adhere to stringent regulatory standards. Renowned for a detail-oriented approach, resulting in significant reductions in defect rates and enhanced operational efficiencies.

EXPERIENCE

LEAD RADIOGRAPHIC TESTING TECHNICIAN

AeroTech Industries

2016 - Present

- Directed radiographic inspections on aerospace components to verify compliance.
- Implemented quality control measures that improved testing reliability.
- Coordinated with engineering teams to assess and mitigate defects.
- Conducted training sessions for staff on advanced radiographic techniques.
- Managed project timelines and deliverables to meet client expectations.
- Reviewed and revised testing procedures to align with industry standards.

RADIOGRAPHIC TESTING TECHNICIAN

Quality Inspections LLC

2014 - 2016

- Performed routine radiographic testing on various materials and components.
- Maintained detailed testing documentation and reporting protocols.
- Assisted in the development of new testing methodologies to enhance accuracy.
- Engaged in team meetings to discuss testing outcomes and improvements.
- Conducted risk assessments to ensure adherence to safety standards.
- Participated in external audits and compliance checks.

- San Francisco, CA

SKILLS

- Non-Destructive Testing
- Aerospace Standards
- Quality Control
- Team Collaboration
- Risk Assessment
- Process Improvement

LANGUAGES

- English
- Spanish
- French

EDUCATION

BACHELOR OF SCIENCE IN ENGINEERING
PHYSICS, TECHNICAL UNIVERSITY, 2013

ACHIEVEMENTS

- Reduced defect rates by 30% through improved testing protocols.
- Promoted to Lead Technician within three years due to outstanding performance.
- Received the 'Excellence in Safety' award in 2021.
