## EDUCATION

PHD IN HEALTH ECONOMICS,  
UNIVERSITY OF CALIFORNIA, BERKELEY

## ACHIEVEMENTS

- Developed a cost-effectiveness model that influenced treatment guidelines in oncology.
- Presented research findings at over 10 international conferences.
- Awarded the 'Best Paper' prize at the Health Economics Conference in 2019.

## PROFILE

Experienced Real World Evidence Researcher with a strong background in pharmaceutical research and health economics. With over 10 years in the industry, I have developed a keen understanding of how real-world data can be leveraged to enhance drug development and patient access strategies. My career has focused on conducting health outcomes research, including cost-effectiveness analyses and comparative effectiveness research.

## EXPERIENCE

### DIRECTOR OF HEALTH ECONOMICS

#### Pharma Innovations Inc.

2016 - Present

- Directed health economics research projects, focusing on the value of new therapies.
- Conducted cost-effectiveness analyses to support pricing and reimbursement decisions.
- Led cross-functional teams to integrate real-world evidence into product development strategies.
- Presented research findings to healthcare stakeholders and at national conferences.
- Developed and validated models to project long-term health outcomes.
- Collaborated with regulatory bodies to align research methodologies with compliance requirements.

### HEALTH OUTCOMES RESEARCHER

#### Clinical Research Associates

2014 - 2016

- Conducted studies assessing the impact of treatments on patient quality of life.
- Managed large datasets, utilizing STATA for data analysis and visualization.
- Authored comprehensive reports detailing research findings for internal and external stakeholders.
- Collaborated with clinicians to ensure alignment of research with patient needs.
- Presented research findings to inform clinical guidelines and best practices.
- Participated in grant writing efforts, securing funding for innovative projects.
