Innovative Renewable Energy Educator with a focus on integrating arts and culture into sustainability education. A unique approach that utilizes creative methods to engage diverse audiences in understanding renewable energy concepts. Extensive experience in designing interdisciplinary programs that combine environmental science with artistic expression. Proven ability to foster collaboration between artists, educators, and community members to create impactful educational experiences.

## WORK EXPERIENCE

### Arts and Sustainability Educator | Creative Energy Initiative

Jan 2022 – Present

- Developed and implemented interdisciplinary programs that merge art and renewable energy education.
- Collaborated with artists to create engaging workshops on sustainability themes.
- Facilitated community art projects that promote renewable energy awareness.
- Utilized art as a tool for public engagement in environmental issues.
- Evaluated program impact through participant feedback and community engagement metrics.
- Organized exhibitions showcasing renewable energy concepts through artistic mediums.

### Community Arts Coordinator | Green Arts Collective

Jul 2019 – Dec 2021

- Facilitated workshops that blend environmental education with artistic expression.
- Engaged local artists to promote sustainability through creative projects.
- Coordinated events that highlight the intersection of art and renewable energy.
- Developed educational materials that utilize artistic methods for teaching sustainability.
- Conducted evaluations to measure the effectiveness of arts-based education.
- Promoted community involvement in sustainability initiatives through art.
