- French

### EDUCATION

**BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING, UNIVERSITY OF CALIFORNIA, BERKELEY**

### ACHIEVEMENTS

- Increased maintenance team productivity by 30% through process improvements.
- Received the 'Outstanding Performance' award for exceptional project leadership.
- Contributed to the successful commissioning of a 200 MW solar plant ahead of schedule.

### PROFILE

Dynamic Renewable Energy Maintenance Manager with an extensive background in managing maintenance operations for large-scale renewable energy projects. Demonstrates a profound understanding of mechanical systems, coupled with a strong commitment to enhancing operational efficiency and safety. Proven ability to lead diverse teams in high-pressure environments while maintaining a focus on achieving organizational objectives.

### EXPERIENCE

#### MAINTENANCE OPERATIONS MANAGER

##### SolarGrid Technologies

*2016 - Present*

- Managed the maintenance of solar energy systems across multiple states, ensuring compliance with regulatory requirements.
- Implemented a new computerized maintenance management system (CMMS) that improved tracking efficiency by 50%.
- Led a team of 30 maintenance personnel, focusing on skills enhancement and operational excellence.
- Conducted regular audits of maintenance practices, resulting in a 20% reduction in operational risks.
- Established key performance indicators (KPIs) to measure maintenance effectiveness and drive continuous improvement.
- Collaborated with project managers to align maintenance strategies with project timelines and deliverables.

#### FIELD MAINTENANCE ENGINEER

##### WindPower Corp

*2014 - 2016*

- Performed maintenance and troubleshooting on wind turbines, achieving a 95% uptime rate.
- Developed maintenance schedules based on equipment performance data, enhancing efficiency.
- Trained junior engineers on safety and maintenance best practices, fostering a culture of safety.
- Participated in the design of maintenance protocols that reduced average repair times by 15%.
- Coordinated with external contractors for specialized maintenance tasks.
- Documented maintenance activities, contributing to the company's knowledge base for future projects.
