## REQUIREMENTS ENGINEER

Innovative Requirements Engineer with a strong foundation in e-commerce platforms, recognized for the ability to enhance user experience through meticulous requirements analysis. Expertise in utilizing customer feedback to inform product features and improvements, ensuring alignment with market trends. Proficient in agile methodologies and collaborative tools, driving efficiency and responsiveness in product development cycles.

## EXPERIENCE

### REQUIREMENTS ENGINEER

E-Commerce Solutions Inc.

2016 - Present

- Conducted user research to gather insights and define requirements for e-commerce applications.
- Developed detailed specifications that guided the design and development of product features.
- Collaborated with UX designers to ensure user-centric design principles were applied.
- Utilized tools like Confluence and JIRA to manage requirements and track project progress.
- Facilitated sprint reviews and retrospectives to enhance team performance.
- Monitored key performance metrics to assess the impact of new features on user engagement.

### BUSINESS ANALYST

Retail Innovations LLC

2014 - 2016

- Engaged with customers to gather feedback and document business requirements for retail systems.
- Assisted in the development of product roadmaps based on user insights and market analysis.
- Documented user stories and acceptance criteria for development teams.
- Supported user testing to validate requirements against customer expectations.
- Participated in agile ceremonies to facilitate communication among team members.
- Maintained a comprehensive backlog of requirements and prioritized tasks effectively.
