

MICHAEL ANDERSON

Senior Requirements Engineer

Results-driven Requirements Engineer with a focus on manufacturing systems, distinguished by a comprehensive understanding of production processes and their optimization. Expertise in gathering and analyzing requirements to enhance operational efficiency and reduce costs. Demonstrated ability to collaborate with engineering teams to translate technical needs into actionable specifications. Proficient in utilizing modeling tools to visualize requirements and facilitate communication among stakeholders.

WORK EXPERIENCE

Senior Requirements Engineer

2020-2023

Manufacturing Innovations Corp.

- Led requirements gathering sessions to define specifications for manufacturing execution systems.
- Collaborated with production teams to identify process inefficiencies and recommend solutions.
- Utilized process mapping techniques to document workflows and system interactions.
- Facilitated cross-departmental workshops to ensure alignment on requirements.
- Monitored project timelines and provided updates to senior management.
- Developed training materials for end-users on new system functionalities.

Requirements Analyst

2019-2020

Industrial Solutions Ltd.

- Engaged with stakeholders to gather and document business requirements for manufacturing systems.
- Assisted in the design and implementation of system enhancements to improve production efficiency.
- Documented user stories and acceptance criteria for project teams.
- Conducted user acceptance testing to ensure requirements were met.
- Participated in project retrospectives to identify lessons learned.
- Maintained a comprehensive requirements repository for future reference.

ACHIEVEMENTS

- Led a project that resulted in a 20% increase in production efficiency.
- Recognized for excellence in requirements documentation and stakeholder engagement.
- Instrumental in achieving a 15% reduction in operational costs through system enhancements.
