Michael Anderson

API ARCHITECT

Proficient REST API Developer with 7 years of experience focused on the telecommunications industry. Proven expertise in developing and integrating APIs that enhance service delivery and customer satisfaction. Strong background in using microservices architecture to build flexible and scalable solutions. Committed to continuous learning and adapting to new technologies to deliver optimal performance.

SKILLS

- RESTful APIs
- Microservices
- Agile
- CI/CD
- SQL
- Java
- Git

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING, INSTITUTE OF TECHNOLOGY, 2015

LANGUAGE

- English
- Spanish
- German

ACHIEVEMENTS

- Recognized for leading the design of an API that improved customer satisfaction scores by 15%.
- Played a pivotal role in reducing API latency by implementing effective caching strategies.
- Received an award for outstanding contributions to cross-departmental API projects.

EXPERIENCE

API ARCHITECT

Telecom Innovations

2016 - Present

- Designed and developed REST APIs for telecommunications applications, improving service efficiency by 25%.
- Led the transition to microservices architecture, enhancing system scalability and resilience.
- Collaborated with product teams to align API functionality with customer needs.
- Implemented CI/CD practices for API deployment, reducing release times by 40%.
- Conducted training sessions for developers on best practices in API design and security.
- Maintained comprehensive API documentation for internal and external stakeholders.

SENIOR API DEVELOPER

ConnectNow Services

2014 - 2016

- Developed and optimized RESTful APIs for customer service applications.
- Played a key role in enhancing API performance, leading to a 20% faster response time.
- Worked with cross-functional teams to ensure seamless integration of APIs with existing systems.
- Monitored and analyzed API usage metrics to inform development decisions.
- Participated in Agile sprints, contributing to user story creation and implementation.
- Supported the documentation and training of new developers on API standards.
