Detail-oriented Security Solutions Architect with extensive experience in government and defense sectors. Over 13 years of expertise in designing and implementing security architectures for sensitive government data and critical infrastructure. Skilled in developing security policies and procedures that ensure compliance with federal regulations and standards. Proficient in conducting risk assessments, vulnerability analysis, and implementing security controls to mitigate threats.

WORK EXPERIENCE

Security Architect
Defense Solutions Group — 2020-2023

- Designed and implemented a security architecture for a government project, ensuring compliance with NIST standards.
- Led risk assessment initiatives that identified and mitigated potential threats to critical infrastructure.
- Developed security policies that improved adherence to federal regulations.
- Collaborated with government contractors to enhance security measures for sensitive data.
- Conducted security awareness training for personnel, increasing compliance by 75%.
- Implemented security controls that reduced vulnerabilities in government systems.

Information Security Specialist
Federal Security Agency — 2019-2020

- Conducted security audits to ensure compliance with federal security standards.
- Assisted in developing incident response plans for national security incidents.
- Collaborated with federal agencies to assess and improve security measures.
- Monitored security alerts and responded to incidents to protect sensitive government data.
- Facilitated training sessions to promote security best practices among staff.
- Evaluated new security technologies to enhance the agency's security infrastructure.

ACHIEVEMENTS

- Successfully led the implementation of security protocols that achieved zero security incidents during audits.
- Recognized for excellence in security management by a federal oversight committee.
- Achieved a significant improvement in security compliance ratings during federal evaluations.
