

MICHAEL ANDERSON

ORGANIC FARM MANAGER

PROFILE

An accomplished Sheep and Goat Farming Specialist with a robust background in organic farming and holistic livestock management. Over a decade of experience in developing and executing sustainable farming practices that enhance animal welfare and environmental health. Expertise in soil health management and pasture-based systems that promote biodiversity and resilience. Proven ability to lead cross-functional teams and engage with stakeholders to drive community-focused agricultural initiatives.

EXPERIENCE

ORGANIC FARM MANAGER

Eco-Friendly Farms

2016 - Present

- Managed all aspects of an organic sheep and goat farming operation, focusing on sustainable practices.
- Designed and implemented pasture rotation schedules to enhance soil health and forage quality.
- Developed educational programs for local farmers on organic livestock management.
- Collaborated with agricultural researchers to test new organic feed formulations.
- Led a team of 5 staff in daily farm operations, ensuring compliance with organic standards.
- Monitored and assessed animal health, implementing holistic treatment approaches.

LIVESTOCK HEALTH COORDINATOR

Heritage Sheep Co.

2014 - 2016

- Coordinated health management programs for a diverse flock, ensuring compliance with health regulations.
- Conducted research on alternative medicine for livestock, leading to improved health outcomes.
- Facilitated community workshops on sustainable farming practices and animal welfare.
- Maintained records of health assessments and treatment outcomes for all livestock.
- Assisted in developing marketing strategies for organic products.
- Engaged with local universities for research collaborations on livestock health.
