- Project Management

LANGUAGES

- English
- Spanish
- French

Experienced Shop Floor Engineer with 9 years in the pharmaceutical manufacturing field. Skilled in maintaining compliance with regulatory requirements and optimizing production processes for safety and efficiency. Proven track record of leading projects that enhance product quality and reduce manufacturing costs. Adept at using process mapping and statistical analysis to identify improvement opportunities.

💼 WORK EXPERIENCE

Senior Production Engineer
2020-2023

PharmaTech Labs

- Led cross-functional teams to implement process improvements resulting in a 25% increase in output.
- Developed and enforced quality assurance protocols in line with FDA regulations.
- Monitored production processes to ensure compliance with safety standards.
- Utilized data analytics to enhance operational efficiency.
- Trained staff on new production technologies and safety practices.
- Documented processes and prepared reports for management review.

Process Validation Engineer
2019-2020

Medicor Pharma

- Executed validation protocols for new manufacturing equipment to ensure compliance.
- Conducted risk assessments to identify and mitigate potential production issues.
- Collaborated with QA teams to resolve production discrepancies.
- Assisted in the preparation of regulatory submissions.
- Participated in internal audits to ensure adherence to quality standards.
- Implemented training programs for staff on validation processes.

★ ACHIEVEMENTS

- Achieved a 30% reduction in production costs through process improvements.
- Recognized for excellence in maintaining compliance during inspections.
- Successfully led a project that improved product quality ratings by 20%.
