- English
- Spanish
- French

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION SYSTEMS, FINANCE UNIVERSITY

ACHIEVEMENTS

- Improved application security ratings by implementing advanced security measures.
- Received a commendation for excellence in project delivery during peak times.
- Successfully contributed to a project that won 'Best Fintech Application' award.

As a passionate Single Page Application Developer with 4 years of experience in the fintech industry, I have focused on creating secure and efficient applications that enhance user experiences. My expertise lies in using React and Redux to build applications that not only meet user needs but also comply with stringent security standards.

WORK EXPERIENCE

FRONT-END DEVELOPER

Fintech Innovations Ltd.

2020 - 2025

- Developed secure single-page applications using React, improving transaction processing speeds.
- Collaborated with backend teams to integrate secure APIs for data transactions.
- Implemented Redux for effective state management, enhancing application responsiveness.
- Conducted performance testing, resulting in a 25% improvement in load times.
- Participated in code reviews to ensure adherence to security best practices.
- Worked closely with UX designers to create user-friendly interfaces that comply with accessibility standards.

JUNIOR DEVELOPER

Secure Banking Solutions

2015 - 2020

- Assisted in developing a single-page application for online banking services using Angular.
- Engaged in troubleshooting and debugging issues, ensuring optimal application performance.
- Collaborated with QA teams to conduct thorough testing and validation.
- Documented application features and user flows for future reference.
- Participated in team meetings to discuss project progress and roadblocks.
- Contributed to the implementation of security protocols for user data protection.
