## PROFILE

Dynamic Smart City GIS Specialist with extensive experience in leveraging geographic information systems to enhance urban infrastructure and services. Expertise includes the application of spatial data analytics to drive smart city initiatives and improve public service delivery. Skilled in collaborating with multi-disciplinary teams to develop innovative solutions that address complex urban challenges.

## EXPERIENCE

### PROJECT MANAGER, GIS SOLUTIONS

#### Smart City Innovations

*2016 - Present*

- Oversaw the implementation of GIS technologies in smart city projects.
- Managed project timelines, budgets, and resource allocation effectively.
- Coordinated with technology vendors to integrate smart sensors into GIS platforms.
- Facilitated stakeholder meetings to align project goals with community needs.
- Developed training programs for city staff on new GIS tools.
- Monitored project outcomes and prepared comprehensive reports for city officials.

### GIS ANALYST

#### Metropolitan Planning Organization

*2014 - 2016*

- Conducted spatial analysis to support transportation planning initiatives.
- Utilized GIS software to create visual representations of data for public presentations.
- Collaborated with engineers to assess the impact of proposed infrastructure projects.
- Maintained and updated GIS databases for accuracy and reliability.
- Produced maps and reports that informed strategic planning efforts.
- Engaged with community stakeholders to gather feedback on planning proposals.
