

# MICHAEL ANDERSON

## SENIOR POLICY ANALYST

### PROFILE

With a strong foundation in social geography and over 10 years of experience in environmental policy, I have dedicated my career to understanding the spatial aspects of environmental justice. My work encompasses interdisciplinary research that integrates social, environmental, and economic factors, informing policy decisions at local and national levels.

### EXPERIENCE

#### SENIOR POLICY ANALYST

##### National Environmental Agency

2016 - Present

- Developed policy recommendations based on spatial data analysis of environmental impacts.
- Conducted workshops with community stakeholders to gather input on environmental policies.
- Collaborated with researchers to evaluate the effectiveness of existing policies on social equity.
- Presented findings to government officials, influencing policy revisions.
- Managed a budget for research initiatives, ensuring efficient allocation of resources.
- Authored grant proposals that secured over \$500,000 in funding for research projects.

#### RESEARCH FELLOW

##### Institute for Environmental Studies

2014 - 2016

- Conducted quantitative research on the spatial distribution of environmental hazards.
- Utilized GIS tools to visualize data and support research findings.
- Engaged with local communities to understand their experiences with environmental issues.
- Contributed to the development of a comprehensive report on environmental justice.
- Presented research at international conferences, expanding the institute's network.
- Mentored junior researchers in data collection and analysis techniques.
