- Published articles in public health journals, contributing to the body of knowledge on health disparities.
- Presented findings at national public health conferences, receiving positive feedback from peers.

Michael Anderson

PUBLIC HEALTH RESEARCHER

Experienced Social Impact Researcher with a focus on health disparities and social determinants of health. Over 6 years in public health research, I have dedicated my career to understanding the complex interplay between socioeconomic factors and health outcomes. My strong analytical skills are complemented by my ability to communicate findings effectively to diverse audiences, including policymakers and public health officials.

EXPERIENCE

PUBLIC HEALTH RESEARCHER

Health Equity Institute

2016 - Present

- Conducted research on health disparities affecting low-income populations.
- Utilized statistical software (R, SPSS) to analyze health outcome data.
- Engaged with community organizations to inform research design and implementation.
- Presented findings to public health officials, influencing funding for health programs.
- Developed recommendations for policy changes to address health inequities.
- Achieved a 25% increase in health service utilization through targeted interventions.

RESEARCH ASSISTANT

Community Health Research Center

2014 - 2016

- Assisted in the evaluation of community health initiatives aimed at reducing disparities.
- Conducted surveys and interviews to gather qualitative data on health access.
- Supported data analysis and report writing for various research projects.
- Collaborated with local health departments on community outreach efforts.
- Participated in workshops to disseminate research findings to community stakeholders.
- Contributed to grant applications, enhancing funding for health research.
