Dedicated Social Research Analyst with a focus on environmental policy and sustainability research. Proven expertise in assessing the socio-economic impacts of environmental initiatives through comprehensive data analysis and stakeholder engagement. Strong analytical skills complemented by a solid understanding of environmental science and policy frameworks. Committed to promoting sustainable practices through evidence-based research that informs policy decisions.

WORK EXPERIENCE

Environmental Research Analyst

2020-2023

Environmental Protection Agency

- Conducted impact assessments of environmental policies using statistical software.
- Developed research reports on the socio-economic effects of climate change.
- Collaborated with local governments to implement sustainable practices.
- Presented research findings to stakeholders and policymakers.
- Authored articles on environmental sustainability for academic journals.
- Led workshops on environmental data analysis techniques.

Research Associate

2019-2020

Sustainability Institute

- Assisted in evaluating environmental programs aimed at reducing carbon footprints.
- Utilized GIS tools to assess land use changes and their impacts.
- Collaborated with community organizations to gather qualitative data.
- Contributed to grant proposals that secured funding for sustainability projects.
- Engaged with stakeholders to disseminate research findings.
- Coordinated educational programs on sustainability practices.

ACHIEVEMENTS

- Led a research project that informed local legislation on climate action.
- Published research in leading environmental journals, influencing policy change.
- Received the Green Award for Excellence in Environmental Research.
