EDUCATION

MASTER'S IN PUBLIC HEALTH,
UNIVERSITY OF HEALTH SCIENCES

ACHIEVEMENTS

- Contributed to a statewide health initiative that reduced chronic disease rates by 15% over three years.
- Recognized for excellence in research communication by the Public Health Association.
- Published findings in a leading public health journal, increasing visibility for health disparities.

PROFILE

Experienced Social Researcher with a strong background in public health and community studies. Over 5 years of hands-on experience conducting research that informs health policies and programs aimed at underserved populations. Proficient in both qualitative and quantitative methods, with a deep understanding of health disparities and their social determinants. Known for strong analytical skills and the ability to translate complex data into actionable insights for public health officials.

EXPERIENCE

SOCIAL RESEARCH COORDINATOR

Health Equity Alliance

2016 - Present

- Coordinated community-based research projects focused on health access among minority populations.
- Designed surveys and conducted interviews to gather health-related data from community members.
- Analyzed qualitative data to identify barriers to health services, informing outreach strategies.
- Presented research findings at national health conferences, receiving positive feedback from peers.
- Collaborated with public health officials to align research with ongoing health initiatives.
- Managed project budgets and timelines to ensure efficient use of resources.

RESEARCH ASSISTANT

State Public Health Department

2014 - 2016

- Assisted in the development and implementation of health surveys to assess community health needs.
- Conducted focus groups with residents to gather qualitative insights on health behaviors.
- Utilized statistical software to analyze data, contributing to statewide health reports.
- Collaborated with cross-department teams to integrate research findings into public health strategies.
- Supported grant writing efforts, helping secure funding for health research initiatives.
- Engaged in community outreach to promote research participation and awareness.
