# MICHAEL ANDERSON

## SOFTWARE AUTOMATION ENGINEER

Enthusiastic Software Automation Engineer with 4 years of experience specializing in mobile application testing. My expertise lies in developing robust automated testing solutions using Appium and Espresso, focusing on ensuring high-quality user experiences across multiple devices. I have a strong foundation in both manual and automated testing, allowing me to identify potential issues early in the development cycle.

## **PROFESSIONAL EXPERIENCE**

### **MobileTech Solutions**

*Mar 2018 - Present*

Software Automation Engineer

- Developed automated test scripts for iOS and Android applications using Appium, increasing testing efficiency by 50%.
- Conducted performance testing on mobile applications, identifying and resolving latency issues.
- Collaborated with developers to integrate automated tests into the CI/CD pipeline.
- Created detailed reports on test outcomes, providing insights for future project improvements.
- Participated in Agile ceremonies to align testing efforts with project timelines.
- Mentored junior QA engineers on automation best practices and tools.

### **Tech Mobile Inc.**

*Dec 2015 - Jan 2018*

QA Tester

- Performed manual testing for mobile applications, ensuring compliance with user requirements.
- Assisted in the development of automated test scripts using Espresso for Android applications.
- Documented test cases and executed regression tests, ensuring high-quality releases.
- Engaged in user acceptance testing (UAT) to gather feedback from stakeholders.
- Analyzed defects and collaborated with developers to prioritize fixes.
- Maintained testing documentation and contributed to process improvements.

## **ACHIEVEMENTS**

- Improved mobile testing efficiency by 50% through the implementation of automation.
- Recognized for outstanding contributions to the mobile testing team.
- Successfully led a project that resulted in a 30% reduction in post-release defects.
