Michael Anderson

SOFTWARE AUTOMATION ENGINEER

Skilled Software Automation Engineer with a focus on financial technology solutions and over 7 years of experience in the industry. I specialize in developing and executing automated test strategies for complex financial applications, ensuring compliance with regulatory standards and maintaining high levels of security. My background includes extensive work with automation tools such as Selenium, Cucumber, and JUnit, allowing me to create comprehensive test suites that cover various scenarios.

EXPERIENCE

SOFTWARE AUTOMATION ENGINEER

FinTech Innovations

2016 - Present

- Developed automated test scripts for financial applications using Selenium and Cucumber, ensuring compliance with industry regulations.
- Created comprehensive test plans and executed functional and regression tests, resulting in a 30% reduction in defects.
- Collaborated with business analysts to gather requirements and translate them into actionable test cases.
- Integrated automated testing into CI/CD pipelines to enhance deployment processes.
- Conducted risk assessments and provided recommendations for improving testing strategies.
- Trained team members on automation tools and best practices, fostering team growth.

QA ENGINEER

Global Finance Corp.

2014 - 2016

- Executed manual and automated tests for financial software, ensuring adherence to quality standards.
- Developed and maintained test documentation to guide testing efforts and facilitate knowledge sharing.
- Participated in code reviews and provided feedback on testability of new features.
- Collaborated with developers to troubleshoot complex defects and implement solutions.
- Engaged in user acceptance testing (UAT) to validate application functionality.
- Contributed to the development of a testing framework that improved efficiency by 25%.
