MICHAEL ANDERSON

SOFTWARE MODERNIZATION ENGINEER

Dedicated Software Modernization Engineer with 6 years of experience in the telecommunications industry, specializing in optimizing legacy systems to enhance operational efficiency. Expertise in analyzing existing applications, identifying areas for improvement, and implementing modern technologies to support business objectives. A strong advocate for Agile practices, I thrive in collaborative environments where innovation and continuous improvement are paramount.

PROFESSIONAL EXPERIENCE

Telecom Innovations Group

Mar 2018 - Present

Software Modernization Engineer

- Analyzed legacy telecommunications systems to identify bottlenecks and propose modernization solutions.
- Led the migration of critical applications to cloud infrastructure, increasing reliability.
- Facilitated Agile ceremonies to improve team collaboration and transparency.
- Implemented monitoring solutions that reduced incident response times by 30%.
- Collaborated with cross-functional teams to ensure alignment between technology and business needs.
- Documented modernization processes for future reference and compliance.

Telecom Services Inc.

Dec 2015 - Jan 2018

Junior Software Developer

- Assisted in the development of new features for telecommunications applications using Python and Django.
- Participated in system testing and quality assurance processes.
- Worked closely with senior engineers to learn best practices in application development.
- Contributed to the documentation of system architecture and design.
- Engaged in troubleshooting and debugging to resolve software issues.
- Supported user training initiatives to enhance adoption of new systems.

ACHIEVEMENTS

- Successfully reduced system downtime by 25% through modernization efforts.
- Awarded 'Employee of the Month' for outstanding contribution to a key project.
- Contributed to a team that won a company-wide innovation challenge.
