- French

### EDUCATION

**BACHELOR OF SCIENCE IN SOIL  
SCIENCE, UNIVERSITY OF FLORIDA**

### ACHIEVEMENTS

- Improved farmer adoption of sustainable practices by 45% through targeted training.
- Recipient of the 'Innovative Educator Award' from the Soil Conservation Society in 2021.
- Successfully secured funding for three major conservation training projects.

Innovative soil and water resource specialist with a strong emphasis on practical training and community engagement. Recognized for delivering impactful educational programs that empower farmers to adopt sustainable practices. Expertise in developing hands-on training materials that facilitate learning and application of soil management techniques. Proven ability to foster collaboration between agricultural stakeholders and environmental organizations to promote responsible resource use.

### WORK EXPERIENCE

#### LEAD SOIL AND WATER TRAINER

National Soil Conservation Agency

2020 - 2025

- Developed and conducted workshops on integrated soil and water management.
- Created training manuals and guides for farmers to implement best practices.
- Utilized feedback mechanisms to refine training content based on participant needs.
- Facilitated partnerships with local organizations to promote conservation efforts.
- Assessed training outcomes through follow-up surveys and interviews.
- Presented at regional conferences to share successful training models.

#### SOIL HEALTH EDUCATOR

Agri-Science Institute

2015 - 2020

- Conducted soil health assessments and provided recommendations to farmers.
- Organized training sessions on the benefits of cover cropping and crop rotation.
- Developed case studies highlighting successful implementation of sustainable practices.
- Engaged with community leaders to promote awareness of soil conservation.
- Managed educational projects that received funding from state agricultural grants.
- Collaborated with researchers to evaluate the impact of training programs.
