EDUCATION

**MASTER OF ENVIRONMENTAL
MANAGEMENT, STATE UNIVERSITY,
2016**

ACHIEVEMENTS

- Successfully led a project that restored 400 acres of industrial land to a natural state.
- Awarded 'Best Practices in Environmental Management' for innovative approaches to soil reclamation.
- Published research on soil restoration techniques in leading environmental journals.

WORK EXPERIENCE

ENVIRONMENTAL PROJECT COORDINATOR

Restoration Partners

2020 - 2025

- Coordinated multi-disciplinary teams in the execution of soil reclamation projects.
- Developed project proposals and secured funding for innovative reclamation initiatives.
- Monitored project progress and ensured adherence to timelines and budgets.
- Conducted workshops to train staff and stakeholders on reclamation techniques.
- Analyzed soil data to inform project planning and decision-making.
- Established partnerships with local organizations to enhance project outreach.

SOIL QUALITY ANALYST

LandCare Solutions

2015 - 2020

- Performed soil quality assessments to identify contamination levels and remediation needs.
- Collaborated with environmental scientists to develop soil restoration plans.
- Utilized laboratory techniques to analyze soil samples for nutrient content.
- Provided recommendations for soil amendments to enhance recovery.
- Participated in community engagement activities to raise awareness about soil health.
- Reported on soil quality improvements post-reclamation efforts.
