EXPERTISE SKILLS

- Voice Recognition
- Mobile Development
- Machine Learning
- Python
- User Experience
- Team Collaboration

LANGUAGES

- English
- Spanish
- French

CERTIFICATION

- Bachelor of Science in Information Technology, State University

MICHAEL ANDERSON

SPEECH RECOGNITION ENGINEER

I am a dedicated Speech Recognition Engineer with over five years of experience in creating and enhancing voice recognition systems for mobile applications. My journey began as a software developer, where I honed my coding skills before transitioning into the specialized field of speech recognition.

PROFESSIONAL EXPERIENCE

Mobile Voice Solutions

Mar 2018 - Present

Speech Recognition Engineer

- Developed a mobile app feature that increased speech recognition accuracy by 35% through model optimization.
- Collaborated with cross-functional teams to define and implement voice capabilities in new applications.
- Conducted A/B testing to assess user interaction and satisfaction with voice features.
- Utilized cloud services for data processing to enhance the performance of speech applications.
- Maintained technical documentation for voice recognition systems, facilitating knowledge sharing.
- Participated in code reviews to ensure high-quality standards in software development.

Tech Innovations Inc.

Dec 2015 - Jan 2018

Junior Speech Recognition Developer

- Assisted in developing speech recognition features for mobile applications, contributing to a 20% increase in user engagement.
- Collaborated with senior engineers to troubleshoot and resolve issues in existing systems.
- Conducted research to identify emerging trends in speech technology and their potential applications.
- Participated in user testing sessions to gather feedback for system improvements.
- Helped create a comprehensive training program for new hires on speech recognition technologies.
- Supported the integration of third-party APIs to enhance functionality of mobile apps.

ACHIEVEMENTS

- Awarded 'Employee of the Month' for exceptional contributions to the development of a voice-enabled application.
- Increased app downloads by 25% after implementing new voice features based on user feedback.
- Contributed to a project that won 'Best Mobile App' at the Tech Innovation Awards.
