

# MICHAEL ANDERSON

## LEAD STORMWATER TECHNICIAN

### PROFILE

Results-driven Stormwater Drainage Technician with a decade of experience in municipal infrastructure projects. Renowned for expertise in stormwater design, permitting processes, and compliance with environmental regulations. Adept at utilizing advanced engineering software to evaluate and enhance drainage systems, ensuring optimal performance and sustainability. Demonstrated ability to analyze complex hydrological data and develop practical solutions that address community needs.

### EXPERIENCE

#### LEAD STORMWATER TECHNICIAN

##### City of Springfield

2016 - Present

- Oversaw the design and implementation of city-wide stormwater management systems.
- Conducted public presentations to inform residents about stormwater initiatives.
- Managed project budgets and timelines to ensure efficient use of resources.
- Collaborated with environmental consultants on compliance and reporting.
- Performed comprehensive inspections of stormwater facilities and systems.
- Provided technical guidance and support to junior staff members.

#### STORMWATER PROJECT COORDINATOR

##### Green City Designs

2014 - 2016

- Developed stormwater management solutions for residential and commercial projects.
- Coordinated with local agencies to facilitate permitting processes.
- Conducted site assessments to identify drainage issues and potential solutions.
- Utilized AutoCAD for designing drainage layouts and specifications.
- Implemented stormwater monitoring programs to assess system effectiveness.
- Engaged with community stakeholders to promote stormwater education.

### CONTACT

- (555) 234-5678
- michael.anderson@email.com
- San Francisco, CA

### SKILLS

- Stormwater design
- Project coordination
- Environmental compliance
- Public outreach
- AutoCAD
- Budget management

### LANGUAGES

- English
- Spanish
- French

### EDUCATION

MASTER OF SCIENCE IN CIVIL ENGINEERING, UNIVERSITY OF ILLINOIS, 2012

### ACHIEVEMENTS

- Implemented a stormwater strategy that increased infiltration rates by 25% across project sites.
- Awarded the Municipal Innovation Grant for developing green infrastructure projects.
- Successfully coordinated a community workshop attended by over 100 participants.
