- Implemented a new data reporting system that improved operational efficiency.

Michael Anderson

SUPPLY CHAIN DATA ANALYST

Detail-oriented Supply Chain Data Analyst with a robust background in healthcare logistics and data management. With over 7 years of experience, I focus on enhancing supply chain operations through effective data analysis and reporting. My expertise lies in utilizing data to improve inventory accuracy and streamline processes in a fast-paced healthcare environment.

EXPERIENCE

SUPPLY CHAIN DATA ANALYST

Healthcare Logistics Inc.

2016 - Present

- Analyzed inventory data to improve accuracy, achieving a 15% reduction in discrepancies.
- Developed dashboards to monitor supply chain performance metrics for healthcare facilities.
- Collaborated with clinical teams to streamline supply procurement processes.
- Utilized data analytics tools to identify cost-saving opportunities in logistics.
- Presented analysis reports to senior management, facilitating strategic decision-making.
- Improved supplier performance tracking, enhancing delivery reliability by 20%.

LOGISTICS ANALYST

Health Systems Group

2014 - 2016

- Conducted data analysis on supply chain operations, identifying bottlenecks and inefficiencies.
- Managed inventory levels and provided recommendations for stock replenishment.
- Produced weekly reports on supply chain performance for operational meetings.
- Collaborated with IT to enhance data management systems for better reporting.
- Trained staff on best practices for data entry and inventory management.
- Assisted in vendor negotiations based on performance data analysis.
