Experienced Systems Developer with a strong background in data-driven applications and database management. Over 7 years in the software development industry with expertise in SQL, Python, and data visualization tools. Committed to delivering high-quality solutions that meet organizational needs while maintaining compliance with industry standards. Proven ability to work collaboratively in agile environments, focusing on delivering value to stakeholders.

PROFESSIONAL EXPERIENCE

Data Insights Corp.   *Mar 2018 - Present*
Data Systems Developer

- Designed and developed data pipelines using Python and SQL, improving data processing speed by 50%.
- Collaborated with data scientists to integrate machine learning models into existing applications.
- Created dashboards using Tableau, enhancing data visualization for stakeholders.
- Conducted performance tuning of SQL queries, achieving a 20% reduction in execution time.
- Implemented data governance policies to ensure data quality and compliance.
- Provided training sessions for team members on data management best practices.

Tech Data Solutions   *Dec 2015 - Jan 2018*
Systems Developer

- Developed and maintained applications for data entry and reporting using C# and ASP.NET.
- Participated in requirements gathering sessions with clients to define project scope.
- Utilized version control (Git) for managing code changes and collaboration.
- Conducted user acceptance testing to ensure the software met client needs.
- Integrated third-party APIs to enhance application functionality.
- Prepared technical documentation for end-users and stakeholders.

ACHIEVEMENTS

- Awarded 'Best Innovator' for developing a data visualization tool that improved decision-making.
- Achieved a 95% accuracy rate in data processing tasks through systematic quality checks.
- Successfully led a project that resulted in a 20% reduction in operational costs.
