PROFILE

Results-driven Technical Education Facilitator with over 10 years of experience in the ICT sector, specializing in the development and delivery of technical training programs. My background includes working in both corporate and academic settings, providing a unique perspective on the educational needs of various audiences. I focus on creating interactive learning environments that encourage participation and practical application of skills.

EXPERIENCE

LEAD TECHNICAL EDUCATOR

Innovate Tech Training

2016 - Present

- Designed and implemented a series of advanced training workshops for software engineers.
- Utilized project-based learning methods to enhance participant engagement and retention.
- Conducted assessments to measure learning outcomes and refine course content accordingly.
- Created an online resource library for ongoing learner support and development.
- Collaborated with industry partners to ensure training relevance and job readiness.
- Mentored junior educators, fostering a culture of professional development within the team.

TECHNICAL SKILLS TRAINER

City College

2014 - 2016

- Developed curriculum for technical courses in networking and cybersecurity.
- Delivered engaging lectures and hands-on labs, resulting in high student engagement levels.
- Implemented a peer-review process for course materials, enhancing content quality.
- Trained faculty members on integrating technology into their teaching practices.
- Facilitated industry partnerships to enhance student internship opportunities.
- Participated in grant writing efforts that secured funding for new training programs.
