SKILLS

- Industrial cybersecurity
- Risk management
- Incident response
- Vulnerability assessment
- Operational technology
- Cross-functional collaboration

LANGUAGES

- English
- Spanish
- French

EDUCATION

BACHELOR'S IN CYBERSECURITY ENGINEERING, TECH UNIVERSITY, 2015

ACHIEVEMENTS

- Improved security posture of critical manufacturing systems by 50%.
- Recognized for outstanding performance with the Industrial Cybersecurity Award in 2022.
- Developed training materials adopted by several organizations in the sector.

Innovative Threat Intelligence Analyst with a strong background in manufacturing and industrial security, possessing over 7 years of specialized experience in protecting critical infrastructure. Demonstrated expertise in identifying potential cyber threats and vulnerabilities unique to the manufacturing sector. Adept at implementing security measures and controls to safeguard operational technology (OT) systems.

WORK EXPERIENCE

INDUSTRIAL CYBERSECURITY ANALYST
ManufactureSecure
2020 - 2025

- Assessed risks associated with operational technology in manufacturing environments.
- Developed incident response plans tailored for industrial control systems.
- Conducted vulnerability assessments on manufacturing equipment and networks.
- Collaborated with engineering teams to integrate cybersecurity best practices.
- Monitored network traffic for signs of cyber attacks on critical systems.
- Provided training on cybersecurity measures to operational staff.

CYBERSECURITY CONSULTANT
SecureManufacturing Solutions
2015 - 2020

- Advised manufacturing clients on best practices for cybersecurity.
- Conducted risk assessments to identify vulnerabilities in industrial systems.
- Implemented security protocols that improved operational resilience by 30%.
- Engaged in incident response drills to prepare for potential cyber threats.
- Worked with cross-functional teams to improve security culture.
- Developed comprehensive reports detailing security assessments and recommendations.
